

A World Where We Can All Thrive.

We've been making wood furniture longer than just about anyone...and we want to be doing so for a long time to come. That's a large part of why we take a stewardship approach to our resources. We believe that environmental sustainability and business profits need not be mutually exclusive. They can and should exist side-by-side in a beneficial relationship. And for more than a century, we've been showing how it's done.

Social Responsibility

We are proud to be a supporter of many local, regional, state, and nationwide organizations and are always looking for opportunities to give back. We do this by donating time, financial contributions, and our products depending upon the support needed.

In 2019 we contributed to over 75 worthy organizations. We are a significant contributor to Mentors for Youth, and actively participate in their events to help our communities.

UV Advantage Plus Finish

Our UV Advantage finish does not emit irritable toxins, formaldehyde, or solvents into the air, contributing to safer and healthier work environments by meeting Indoor Air Quality Certification requirements.

UV Advantage exceeds the performance of other UV topcoats available on durability and reduces the likelihood of damage from abrasions, scratches, and common chemicals, all while magnifying the beauty of wood and lessening the darkening, aging, and yellowing process that naturally occurs over time.

A LEVEL® Portfolio

level®, BIFMA's sustainability certification program for furniture, is a comprehensive and transparent third-party certification program. The level mark attests that the product, the manufacturing facility, and the company responsible for the product brand, have been evaluated against the multi-attribute criteria of the ANSI/BIFMA e3 Furniture Sustainability Standard.

Products certified under the level program can be chosen with confidence. All of Indiana Furniture's solutions are BIFMA level® Certified.

Indoor Air Quality Certified

All of Indiana Furniture's products have achieved Intertek's ETL Environmental VOC Certification and are recognized as products that safeguard indoor air quality.

The certification demonstrates that Indiana Furniture's products conform to the ANSI/BIFMA Furniture Emissions Standards (M7.1/X7.1-2011) for Office Furniture Systems and Components. They also earn points for US Green Building Council's LEED Credits.

LEED Contribution

As a member of the U.S. Green Building Council, one important extension of our commitment to the environment is our work to support the Council's LEED Program.

The LEED program is a voluntary certification system designed to promote buildings that are environmentally responsible, profitable, and healthy places for people to live and work. The U.S. Green Building Council also encourages companies to identify opportunities to salvage and reuse furniture in project design and research potential material suppliers.

Indiana Furniture can help customers seeking LEED-certification through products that can contribute to specific criteria.

TSCA Title VI (CARB)

EPA's TSCA Title VI (formerly CARB), the Formaldehyde Standards for Composite Wood Products Act, establishes the most stringent standards for composite wood.

These products include but are not limited to Particleboard, MDF, Hardwood Plywood, and Laminated products.

Indiana Furniture products meet the TSCA Title VI regulations. Invoices and product labels include a statement of compliance.
